

Santhosh M

Aspiring Software Developer

Motivated and technically skilled Java Backend Developer with hands-on experience in building scalable applications using Spring Boot, Hibernate, and MySQL. Strong foundation in core Java, RESTful API development, and database design. Committed to writing clean, maintainable code and contributing effectively to collaborative, real-world software projects.

EDUCATION

Bachelor of Science - Computer Science

KSG college of Arts and Science

08/2022 - 04/2025

Coimbatore - Tamil Nadu

HSC

Wisdom Matriculation Higher Secondary School

06/2021 - 05/2022

Tiruppur, Tamil Nadu

Major

- Math with Computer Science

EXPERIENCE

Java Developer - Trainee

Sun Software Pvt. Limited

12/2024 - 03/2025

Coimbatore, Tamil Nadu, India

Achievements/Tasks

- Built a full-stack Inventory Management System using Spring Boot, Hibernate, and MySQL, enabling real-time tracking of 2,000+ items. Integrated RESTful APIs and modular backend architecture to streamline operations and reduce inventory discrepancies by 15% in one quarter.
- Strengthened understanding of the Spring Framework for building scalable, modular backend applications with clean architecture and RESTful API design.
- Improved debugging, problem-solving, and database handling skills through hands-on development.
- Participated in collaborative code reviews and implemented feedback to improve code quality, maintainability, and adherence to best practices.

PERSONAL PROJECTS

Banking Management System (12/2024 - 03/2025)

- Built a desktop application to manage banking operations like account handling, transactions, and balance checks.
- Engineered a responsive UI using Java Swing and implemented secure data management with MySQL; integrated Spring Boot and Hibernate for robust backend architecture and ORM support.
- Link: [SanthoshBSc/Banking-Management-System](#)

Mini Projects (03/2025 - 06/2025)

- Student Course Management System – Built a backend application using Spring Boot and MySQL to manage student enrollments, course details, and academic records through RESTful APIs.
- Built a RESTful To-Do List app using Spring Boot, with Hibernate and MySQL for persistent task management. Designed clean API endpoints to support frontend integration and scalable backend architecture.
- Built a Student Course Management System using Spring Boot, with Hibernate and MySQL for managing student profiles and course enrollments. Designed RESTful APIs to support frontend integration and maintain scalable backend architecture.

CERTIFICATES

Java Programming (02/2025)

Learned OOP concepts, exception handling, collections, and hands-on projects using Java.

MySQL Fundamentals (03/2025)

Learned basic SQL queries, table creation, joins, and data filtering for structured data management.

Python Programming (02/2025)

Learned core Python concepts including data types, control structures, functions, and file handling. Practiced problem-solving using loops, conditionals, and basic algorithms.
